The 2nd "Glass Supper" is presented by Intelligent Glass Solutions

Friday 7th December 2012 • City Hall, Queens Walk, London

THE GLASS SUPPER

Firmitas, Utilitas, Venustas

A group of people effectively co-ordinated (or connected) in a harmonious spirit provides more thought-energy than a single person or a single brain. When a group of individual brains are coordinated and function together in harmony, the increased energy through that alliance becomes available to every individual in the group, like a dynamic sixth sense, or an energetic twelfth man on a football field, or like infinite intelligence lifting you to a higher and clearer level of thought.

Architects have made their love for glass clear. It is, to them all, the material of choice. The glass industry however must not lean back in its chair, put its well heeled feet on the table, smoke an expensive cigar and think the job is done. Far from it, our understanding of late is that architectural glass is losing its glamour and despite their love for this sexy see-through material, less glass is being specified in buildings. One architect uses 30 - 35% of glass in his buildings when previously he used up to 70%. Why is this?

Apparently glass DOES NOT do the things architects require, technology does not move fast enough, there is a lack of innovation and our market share will continue to shrink. The strapline “where will the glass industry be in 100 years time?” came from the lips of internationally renowned architect Ken Shuttleworth (part of the Foster+Partners design team for the Gherkin and Glass Supper venue City Hall, amongst others). His words verbatim; where does the glass industry think it will be in 100 years time, do they actually think that far ahead? Well, the red rag is being waved, the bulls are kicking up dust and snorting.....preparing to charge.

The event begins with an afternoon of open discussions (bull fighting) taking a long hard look at the architectural glass industry and all its imperfections. We look at the ancient Vitruvian Virtues of firmness, usefulness and delight and see how they influence building design and human lifestyles in the modern day.

The 2nd “Glass Supper” is presented by **Intelligent Glass Solutions**

Friday 7th December 2012 • City Hall, Queens Walk, London

THE GLASS SUPPER

Event Speakers:

Albert Dubler
President of the International
Union of Architects

The 2nd "Glass Supper" is presented by **Intelligent Glass Solutions**

Friday 7th December 2012 • City Hall, Queens Walk, London

THE GLASS SUPPER

Schedule of events

12noon	Registration
1.00	Opening Speaker • Albert Dubler - <i>The thing about glass</i>
1.25	Tristram Carfrae • <i>A global overview, architectural trends around the world and what the glass industry should really be doing</i>
1.50	Ian Ritchie • <i>Looking at glass architecture through the eyes of Vitruvius</i>
2.15	Hugh Dutton • <i>Life in the world to come - Likely trends in the complexity of designing future cities</i>
2.45	Ken Shuttleworth • <i>Throwing Stones. Straight Talk from a straight talker on the symbiotic relationship with glass and how things have changed</i>
3.10	PANEL DISCUSSION WITH OPEN AUDIENCE PARTICIPATION leading into the break at 3.30pm.
3.30	BREAK - Traditional English cream teas, scones and clotted cream (cream then jam - period)
4.00	Graham Fairley • <i>The importance of widening membership of the SFE to ensure facade engineers have a recognised mark of approval - a brand.</i>
4.20	Mirko Arend • <i>A personal invitation to BAU 2013</i>
4.30	Erieta Attali • <i>Reflected Transparency</i>
5.00	Danny Lane • <i>Taking the material to extreme limits - Sculpting in glass</i>
5.25	Q & A's
5.30	Champagne Reception , exchanging numbers and some light music. <i>*Sponsored by SIKA Services AG</i>
7.30	The Glass Supper
10.30	Carriages
