

Gibson Hall, Bishopsgate, London • Thursday 1st December 2016

the Glass Supper 2016

Pollution - the architects role

EVENT PARTNERS:

ARUP

The Glass Supper 2016 is presented by **Intelligent Glass Solutions**

FACE TO FACE LEADS TO BETTER UNDERSTANDING

If you're looking to close a deal or hire a new recruit, it's impossible to beat meeting in person, face to face. According to the Measuring Face Value Report from the Centre for Economics and Business Research (oh yes there really is such a thing), "When a company does business face to face, it stands to gain an average income boost of £248,100 a year. Meeting prospects in person increases revenue by an average 34 per cent a year and for every £1 spent on business travel, there's a 60 per cent return on investment". This research was commissioned for Premier Inn. A subtle shrug or a firm handshake can make a huge difference to the outcome. Taking time to step away from your desk and show customers, clients or other associates that you care enough about your relationship to come and see them in their own environment sends a great message and says a tremendous amount about your approach to doing business.

We have been banging the drum about the importance of seeing one another and coming together in face to face communication for a long time. Right from the outset, which is ever such a long time ago now, 2011, at the inaugural Glass Supper we headlined our opening text in the flyers, brochures and subsequent program, "A Perfect Understanding". This is because we have always been aware that face to face communication is perfect communication and leads to a perfect understanding, an essential facet of successful businesses. Right from the outset, the sole objective of the Glass Supper has been to be a conduit to facilitate face to face communication, to cut through the BS and enable clear, unpretentious, unambiguous conversation, so we can get to know, understand and do business with each other....perfectly.

THE POST “BREXIT” ECONOMY

Will the last person to leave the country please turn the lights out

How appropriate is this 1992 headline now?

Long lasting business relationships are built on firm friendships and a clear understanding of each others business needs and objectives. For this reason, we believe it's important to get to know our business partners better than ever so we can forge an even closer bond and fully focus on the things that are really important to them, to meet with and to frequently exceed, their expectations. *Extract taken from the Glass Supper flyer in 2011*

On the morning of Friday June 24th the population of the United Kingdom woke up to the shock news that we had voted to leave the European Union. Some people, the majority of Brits apparently, voted to ring-fence their country to keep other people out. I think it was Rem Koolhaas who said the people that voted for Brexit were nostalgic and pining for the good old days of the British Empire, well those days have gone and so will the elderly people that voted for Brexit by the time it comes around, they'll be gone too. But hey ho, it is what it is so let's focus on the here and now and do our best to make some sense out of nonsense. Some of the Glass Supper 2016 Speakers HAVE the crystal ball, they KNOW how this is going to pan out. They will look into the pro's and con's of Brexit for the architectural glass economy from the UK point of view and also from the wider European Community's perspective. You will get the chance to share your views and express your feelings about this, whatever they may be. Make your voice heard on this very important topic at this years Glass Supper in Gibson Hall, Bishopsgate. How are we going to get to know our business partners and colleagues better if they are not allowed to come into the country, how will innovation pick up speed? The UK is, well and truly, you know..... it begins with an F.

THE SPEAKERS

THE 2016 EVENT MODERATOR

Miriam White

Architect, Project Manager, Co Founding Partner of CDLP Developments

OPENING SPEAKER

Annie Hampson

City of London Corporation's Chief Planning Officer and Development Director

ADDRESSING THE AUDIENCE ON THE "POST BREXIT ECONOMY"

Emily Wallace

CEO, GK Strategy (UK Parliament Advisors)
BREXIT (Political & Policy Advisors)

The World Famous Glass Supper Registration Team:

Maria Jasiewicz
Allen Naik

Ably assisted by: The Glass Supper Super Ladies:

Katrina Vasilieva
Georgie Bourne
Olivia

Official Glass Supper Photographer

Shooter No.1 Angelo Valentino &
film crew

Musical entertainment provided by

Dominic B & His Jazz Band

AV, lighting and on site sound engineers provided by

prLive of London

The Glass Supper series of
events are brought to you
by Intelligent Publications
Limited (IPL), publishers of
Intelligent Glass Solutions (IGS)
Magazine.

Nothing more, nothing less.....
nothing Else!

THE SPEAKERS

AFTER THE COFFEE BREAK WE LOOK AT THE GLOBAL MENACE OF POLLUTION - THE ARCHITECTS ROLE PT.1

ARUP: Ann Marie Aguilar

Healthy green buildings

Priedemann Facade Experts: Lars Anders

Intelligent Glass Facades can reduce pollution...a critical look at facade trends, technologies & case studies - realizing optional sustainable solutions.

Glass for Europe: Bertrand Cazes

Bertrand will grab the bull by the horns and discuss the industry's role and commitment to tackling air pollution and related challenges.

Sandeep Kashyap

Sandeep Kashyap of Kuraray, manufacturers of the Trosifol brand of interlayers will provide an expose on noise pollution and its effects on the occupants inside of a building. Sandeep will show how we can reduce this global problem allowing for more productivity in the workplace and in the home.

Alan McLenaghan

Alan McLenaghan CEO of Sage Glass will discuss the growing trend in the building sector for adaptive facades and how this technology contributes significantly to the health and well being of not just occupants but the building itself. Glass Supper guests will hear how architects now say that health plays a big part in how they design their buildings.

EVENT SCHEDULE

11.30am: Doors open for registration, chat, hugs and spread the love

THE EVENT OF THE YEAR OFFICIALLY BEGINS!

12.50pm: Greetings and outline of events from Moderator - Miriam White

1pm: Opening Presentation: Ms Annie Hampson, Chief Planning Officer & Development Director for the City of London

1.30pm: Ms Emily Wallace (GK Strategy): *Exiting Europe. How will BREXIT affect the glass and facade sector of industry?*

2pm: Mr Bertrand Cazes, Glass for Europe: *The role of the glass industry in tackling air pollution*

2.25pm: Ms Anne-Marie Aguilar & Mr. Alistair Law of ARUP: *Healthy buildings and the Well Building Standard*

2.50pm: Round-up from Miriam White - The Moderator

3pm: 30 Minute Coffee break - TIME TO TALK

3.30pm: Lars Anders - Priedemann Facades: *Clever Building Skins to Reduce Pollution*

3.55pm: Sandeep Kashyap - Kuraray/Trosifol: *External noise pollution stifles internal productivity*

4.20pm: Alan McLenaghan - SageGlass: *Adaptive Facades can positively impact the health & Well being of Buildings*

4.45pm:

5.20pm: Final Round-up from Miriam White

5.30pm: CHAMPAGNE RECEPTION SPONSORED BY SIKA SERVICES • Musical performance by Dominic Bentham and his Jazz band

7.30pm: Head back into the Grand Hall for the evening meal - The Glass Supper

8pm: The Glass Supper will be served

9pm: Society of Facade Engineering (SFE) Facade of the Year 2016 Awards

10.30pm: Freak out - dancing, frivolity & fun, fun, fun at the 2016 Glass Supper After Party

2am: Day is done, gone the sun - Thank you for coming, it was good to see you!

THE MODERATOR

Miriam White

Miriam White has 30 years' experience in the Construction Industry. Her broad sector experience includes Aviation, Civic, BCO Offices, High End Residential, Education and Hospitality at each stage from Concept Design through to Design and Project Management.

She has afforded very senior design and management roles for prestigious architectural practices as Norman Foster and Partners, Rafael Viñoly Architects, RMJM and Pringle Brandon Perkins+Will. Heading up multidisciplinary teams on large scale Projects around the world included Hong Kong International Airport in HK, HSBC Headquarters Tower at Canary Wharf, the regeneration of the Spitalfields Market together with the development of Allen and Overy London Commercial Offices, the delivery of 2 Mixed Use Towers forming part of the mega King Abdullah Financial District 30 Tower development in Saudi.

Miriam is reputed in the industry for leading projects to successful completion on Time, on Budget and in Compliance.

In 2016 Miriam co founded Clyde Dixon Land & Property (CDLP Ltd) whose portfolio include the procurement and delivery of various Hotels in the UK.

"In 30 years I have seen how the impact of technological development within the building and industry and technologies of the 'non-building industry' has effected the way we design, procure, manufacture components and build buildings. Notwithstanding the changing way in which the building will house its occupants both now and in the future. Nowadays, more than ever, the responsibility for buildings to perform in accordance with changing legislative controls requires a design and project management agility that can accommodate research and development in a timely fashion in order to assure compliance today, tomorrow and ability to respond to an ever developing market." **Quote by Miriam on Project Management and the ever changing technical challenges faced by the industry.**

Miriam currently provides independent Design Due Diligence for large scale London based developments.

THE SPEAKERS

Annie Hampson

Annie Hampson is the City of London Corporation's Chief Planning Officer and Development Director responsible for development, design, heritage, conservation and enforcement matters.

She was involved in the City's evolution in providing modern, innovative and effective buildings resulting in the redevelopment of over a third of the City's building stock whilst safeguarding its historic character and considerably enhancing its street scene and retail diversity.

She has dealt with some of the most high profile, high value developments in the country, including the Gherkin, Paternoster Square, the Eastern Cluster towers.

She dealt with Merrill Lynch's headquarters, a significant success in that it included the largest dealing floors in Europe, but knitted around a scheduled ancient monument, Grade I and II listed buildings in a conservation area, dealing with at the same time, the Millennium Bridge.

She is the Local Authority advisor on the CofE London Diocesan Advisory Committee (the Church's equivalent of a planning committee) and is on the Association of London Borough Planning Officers and the Major Developers Group organised by Sir Stuart Lipton.

Emily Wallace

Emily is an experienced and award-winning communications professional, with in-depth knowledge of Westminster gained over 20 years.

Named Public Affairs News Consultant of the Year in 2013 for her insightful and practical support of clients large and small, Emily is a highly experienced public affairs practitioner with an approachable and engaging manner.

As former Chair of the PRCA Public Affairs Group, she is also committed to promoting high ethical standards in lobbying and championing the contribution the industry makes to the policy and political process. Her contribution was recognised in 2013 when she was shortlisted for a Women in Public Life award.

Emily continues to provide clients with day to day advice, primarily focusing on delivering high value consultancy and strategic support, developing and implementing strategies, helping clients to embed their political communications into their wider business objectives.

THE SPEAKERS

Bertrand Cazes

Bertrand Cazes is the Secretary General of Glass for Europe, the association of Europe's manufacturers of building, automotive and solar-energy glass. Bertrand is actively involved in EU regulatory issues affecting the glass industry and can advise on trends in policies that will affect the construction industry. Bertrand has over 10 years of experience in EU policy advice for industries and has been working on glass for a number of years.

Bertrand will grab the bull by the horns and discuss the industry's role and commitment to tackling air pollution and related challenges.

Ann Marie Aguilar

Ann Marie Aguilar is Associate Director, Wellbeing and Sustainability. Ann Marie joined Arup Associates in 2006 as a Sustainability Design Specialist. Her focus at Arup Associates is about improving human experience in the built environment and the opportunities to instil "Wellness in the Workplace". She is a passionate advocate of the impact of Space Design on Human Behaviour & Performance having recently taken part in an 18 month research project with the RIBA, Royal Academy of Engineering and DCLG on that topic. Ann Marie has recently achieved WELL Accredited Professional (AP) Accreditation from the International Well Building Institute (IWBI), based in Washington DC. In the last 24 months she has been involved in the coordination and development of Arup's Health & Wellbeing Consultancy business in the UKMEA region.

THE SPEAKERS

Lars Anders

Lars Anders is the Managing Director of Priedemann and Facade-Lab Research & Development Centre, which accomplishes tasks relating to the facade or building envelope. In this role, Lars manages and leads along with his managing partners, a team providing all services in façade planning, consulting and engineering as well as in other project-related assignments like product research and functional development.

Lars is a seasoned engineer (of 30 years) and holds a degree in Civil Engineering (University of Applied Sciences in Berlin, 1985). Inspired by building skins and their limitless possibilities, with his experience team Lars provides interdisciplinary services to investors and developers, architects and consultants, main contractors and fabricators, which have enabled them to achieve a higher level of efficiency, quality and cost certainty in the development and execution of their facade projects.

Sandeep Kashyap

Sandeep Kashyap has over 25 years experience spanning over 3 continents and industries such as engineering, composite materials and cutting edge technologies.

He pioneered the dynamic glazing solutions market in the U.K. before joining the Market leading Trosifol(r) architectural business of Kuraray in 2015. In his current role, he is responsible for leading the Trosifol(r) business in the global architecture design hub of London as well as the rest of U.K. and Ireland.

Sandeep has previously presented a paper at the GPD Mumbai on the "Future of Dynamic Glazing". At the Glass Supper 2016 in London this year, he will present his thoughts on noise pollution, and how a comprehensive design strategy can help designers achieve the best in class acoustic performance from glazing and facade systems for a better, safer, quieter and more efficient built environment.

THE SPEAKERS

Dr. Alan McLenaghan

Dr. Alan McLenaghan, CEO of SageGlass, is an 18 year veteran of the Saint-Gobain group, the parent company of SageGlass.

Prior to becoming CEO, Alan served as the Sr. VP of Technology for Saint-Gobain's Containers Division (glass bottles), Global VP Manufacturing for Saint-Gobain Glass (Flat Glass) and Managing Director of Saint-Gobain Glass UK Ltd. Despite the "high powered" titles, Alan considers himself a practical, straightforward Scot and was recently described by a well-known industry blogger as looking and sounding like a Scottish football (soccer) player.

Alan started his career in the late 80's with the chemical companies, ICI and DuPont, working in several European countries, North America and China.

He considers it the ultimate honor to have been asked by Saint-Gobain's executive leadership to bring to the global market the most innovative product and technology to emerge in the glass and glazing industry since the advent of flat glass produced by the float process:- SageGlass "electrochromic dynamic glazing".

Alan holds a B.S. in Applied Chemistry and a Ph.D. in Polymer Physics from universities in his native Scotland.

Alistair Law

Alistair has a background in facade and structural design and specialises in the latest research and innovations in façade technology. He also has a strong interest in material technology, industrial design and sustainability. His structural engineering experience is concentrated on integrated, low carbon solutions regularly pushing the boundaries of what is possible.

Alistair has worked for Arup for almost 10 years but has also worked for an architect in their research department. He led the technical team of this department. Developments included and innovative micro-algae façade system. He has since gone on to invent a new vegetalised green wall system.

Responsible for research and development in the facades group UK he is always looking to promote the latest thinking and push the boundaries of what is possible. Both in new product concepts and in his project work. He also has significant experience on the design of vegetated green facades.

FAÇADE OF THE YEAR AWARDS 2016

EVENT SPONSORS

The Society of Façade Engineering (SFE) is the world's leading professional body representing façade professionals. The 'FAÇADE' series of competitions began in 2013 and is created, managed and judged by leading exponents of façade engineering and design. Recognition through the competition is increasingly regarded internationally as a serious and highly desirable accolade. Previous winners include projects from Abu Dhabi, Canada and the UK with finalists including projects as far afield as China and Australia.

For 2016, finalists have been chosen from a significantly increased number of entries from around the Globe. The diversity, creativity and sheer quality of the entries overall succeed in fulfilling the original concept of the competition in identifying excellence in façade design and engineering; the finalists take the discipline to a whole new level.

Those attending this year's Glass Supper will therefore be the first to learn – including the winners – the names of those that have been judged to be amongst the very best in the world of architectural façades and, for this year at least, to have completed façades that are truly remarkable.

PAST WINNERS

Al Bahr Towers

Abu Dhabi

62 Buckingham Gate

London

Bombay Sapphire Distillery

Hampshire, UK

Ryerson Student Learning Centre

Toronto

For 2016, finalists have been chosen from a significantly increased number of entries from around the Globe. Those attending this year's Glass Supper will be the first to learn the names of those that have been judged to be amongst the very best in the world of architectural façades.
